👤 ABOUT

- I translate complex client challenges into human-centric product opportunities
- I am a curious, empathetic collaborator who challenges assumptions, works closely with engineers, and takes ownership when problems are ambiguous

🔧 RELEVANT WORK

- ▶ **Accessible Graph Navigation for Blind Users** *Aug' 25*
Educational Testing Serviceal (ETS) through Jyväskylä Yliopisto | Finland
 - Analyzed user workflows & identified accessibility barriers in independent graph navigation through guerrilla interviews with blind users (former GRE test takers)
 - Synthesized qualitative findings into multimodal user interaction requirements
 - Prioritized real-time graph sonification for MVP over haptic & thermal features maximizing accessibility impact against development time, hardware requirements, stakeholder access (blind STEM students) & a 7-day delivery constraint
 - Developed a Python/PyQt prototype for real-time graph sonification, enabling independent exploration of graphical patterns without human or AI assistance
 - Validated heuristic usability of delivered prototype through somatic role-playing, which was accepted as adaptable by an ETS-affiliated exam product specialist
- ▶ **Assistive Technology for Hybrid Programming** *Dec'22-Feb'23*
Jupiter Thebe through University of Lausanne | Switzerland
 - Led customer discovery through 38 interviews & data analysis, translating hybrid group-workflow insights of students into prioritized product opportunities
 - Drove iterative product discovery and validation through a participatory design workshop with 32 students (8 hybrid groups), facilitating collaborative ideation where student groups brainstormed ideal platform experiences in hybrid meetings, developed hand-drawn concepts physically, and provided peer feedbacks
 - Synthesized collected qualitative data into 10 actionable product recommendations, identifying high-impact opportunities for personalized teacher-student communication, note sharing, and coding privacy controls based on individual student needs, improving usability of Jupiter Thebe coding assistant platform
- ▶ **Phygital Civic Engagement Platform with AI & API** *Sep'21-Feb'22*
EPFL | Switzerland
 - Led product strategy for a scalable phygital civic platform, connecting activists, creators, and physical resource contributors, digitizing collaborative city activism
 - Defined an AI recommendation engine with API integrated feedback loops that analyzes semantic context of user activities to recommend personalized content
 - Designed the end-to-end system workflows with 3 teammates, connecting app interfaces & API agents for recommendation feedback loops & crowdsourcing

🏠 OTHER SELECTED WORK

- ▶ **Edge-Native Banking App for Pre-teenagers** *Pursuing*
Solo Personal Project
 - Formulating product strategy for a local-first banking app for pre-teens (age 3 to 11), enabling self-learning of financial literacy & emotional decision-making
 - Designing an offline-first, API-based app with parent access for guided literacy
- ▶ **Immersive Technology for K12 Spatial Learning** *Pursuing*
Mater Thesis – Zoe Immersive through EPFL | Hybrid
 - Examining VRLE design requirements (embodiment, agency, presence) from the perspectives of K12 teachers for effective pedagogy & perceptual learning
- ▶ **Haptic Perception in Teleoperation Robotic Systems** *Jun'21-Sep'21*
Ericsson | Sweden
 - Co-developed a haptic teleoperation prototype connecting 2 Omni haptic pens
 - Led experiment design & front-end development, using a modular LEGO object to manipulate physical load while examining latency, jitter, & camera constraints
 - Elicited impact of network variable changes on haptic perception by A/B Testing
- ▶ **Counterfeit Integrated Circuit Detection** *2017-2018*
Bachelor Thesis – IIT Kharagpur | India
 - Compared image processing (Matlab) vs computer vision (TensorFlow) for counterfeit IC detection using self-developed dataset of 6000 microscopic images

🎓 EDUCATION

- ▶ **MSc Interactive Media Technology**
KTH Royal Institute of Technology
Graduate Exchange | EPFL, Switzerland
Expected 2026
- ▶ **BTech Information Technology**
West Bengal University of Technology
Degree Project | IIT Kharagpur, India
2019

👨‍🏫 TEACHING EXPERIENCE

- ▶ **Teaching assistant | KTH, Sweden**
 - Machine Learning
 - Programming Fundamentals
 - Multivariable Calculus
 - Computer Networking
 - Visualisation
- ▶ **Visiting Lecturer | NSHM Kolkata, India**
 - Interactive Computer Graphics

🔧 CORE COMPETENCIES

- ▶ **UX Research:** Diary Study, A/B Testing, Soma Design, Survey Contextual Inquiry, Interviewing
- ▶ **Applications:** Miro, Figma, Unity3D
- ▶ **Programming:** Python, C/C++
- ▶ **Libraries & Frameworks:** Jest-Axe, PyTorch, Tensorflow, Pyttsx3, Plotly, Jax, OpenCV, GLSL
- ▶ **Project Management:** Jira, Notion
- ▶ **Tools:** Reality Capture, Claude API, Git, Colab
- ▶ **AI Art:** Midjourney, Stable Diffusion, Kling AI
- ▶ **Devices:** Oculus, HTC HMD-Tracker, P Omni

🗣️ LANGUAGES

- ▶ English **C2**
- ▶ Bengali **C2**
- ▶ French **A2**

🤝 VOLUNTEER EXPERIENCE

- ▶ **EPFL Consulting Society:** Mentored (1sem)
- ▶ **Albaladejo Rugby:** Won match against Geneva
- ▶ **HackZurich:** Liaised participant & companies
- ▶ **KTH AI Society:** Hosted podcasts & hackathons

❤️ ADDITIONAL

- ▶ **Citizenship:** Indian
- ▶ **Interests:** • Anime • Musical Somatic Thinking
- ▶ **Availability:** From December 2026
- ▶ **French Training** A2 – B1 at CAEL Paris
