👤 ABOUT

- I turn ambiguous client problems into human-centric product opportunities
- I am a curious, empathetic collaborator who challenges assumptions, works closely with engineers, and takes ownership when problems are ambiguous

🔧 RELEVANT WORKS

- ▶ **Immersive Technology for K12 Spatial Learning**
Zoe Immersive through EPFL | Hybrid
 - Examining VRLE design requirements (embodiment, agency, presence) from the perspectives of K12 teachers for effective pedagogy & perceptual learning
- ▶ **Accessible Graph Navigation for Blind Users**
Educational Testing Serviceal (ETS) through Jyväskylä Yliopisto | Finland
 - Analyzed user workflows & identified accessibility barriers in independent graph navigation through guerrilla interviews with blind users (former GRE test takers)
 - Synthesized qualitative findings into multimodal user interaction requirements
 - Prioritized real-time graph sonification for MVP over haptic & thermal features maximizing accessibility impact against development time, hardware requirements, stakeholder access (blind STEM students) & a 7-day delivery constraint
 - Developed a Python/PyQt prototype for real-time graph sonification, enabling independent exploration of graphical patterns without human or AI assistance
 - Validated heuristic usability of delivered prototype through somatic role-playing, which was accepted as adaptable by an ETS-affiliated exam product specialist
- ▶ **Assistive Technology for Hybrid Programming Education**
Jupiter Thebe through University of Lausanne | Switzerland
 - Led customer discovery through 38 interviews & data analysis, translating hybrid group-workflow insights of students into prioritized product opportunities
 - Drove iterative product discovery and validation through a participatory design workshop with 32 students (8 hybrid groups), facilitating collaborative ideation where student groups brainstormed ideal platform experiences in hybrid meetings, developed hand-drawn concepts physically, and provided peer feedbacks
 - Synthesized collected qualitative data into 10 actionable product recommendations, identifying high-impact opportunities for personalized teacher–student communication, note sharing, and coding privacy controls based on individual student needs, improving usability of Jupiter Thebe coding assistant platform
- ▶ **AI-Enabled Civic Engagement through Phygital Experiences**
EPFL | Switzerland
 - Synthesized a participatory phygital platform in order to transform unused urban surfaces of Lausanne city into collective visual expressions of difficult emotions
 - Crafted a scalable framework for crowdfunded asset-matching by connecting geolocated users & their resources via closed-loop adaptive recommendations
- ▶ **Haptic Perception in Teleoperation Robotic Systems**
Ericsson | Sweden
 - Developed a haptic teleoperation system with 2 omni haptic pens & a lego-based experimental object to provide different stiffness perception to the users
 - Storyboarded experience design & developed front-end (latency, jitter, camera)
 - Elicited impact of network variable changes on haptic perception by A/B Testing
- ▶ **Group Productivity in Multimodal Workplace Technologies**
Furhat Robotics through KTH | Sweden
 - Formulated impact of modalities of telecommunication media (Furhat, VRChat, Zoom) on independent & collaborative creative thinking in hybrid group activities

🎭 OTHER SELECTED WORK

- ▶ **Avatar Facial Expression Recognition in Virtual Reality**
EPFL | Lausanne, Switzerland
 - Built avatar expression dataset ($n = 27$) & emotional recognition pipeline in VR
- ▶ **Counterfeit Integrated Circuit Detection**
Bachelor Thesis at IIT Kharagpur | Kharagpur, India
 - Compared effectiveness of image processing vs computer vision of counterfeit integrated circuit detection after developing a dataset of 6000 photomicrographs

🎓 EDUCATION

- ▶ **MSc Interactive Media Technology**
KTH Royal Institute of Technology
Graduate Exchange | EPFL, Switzerland
Expected 2026
- ▶ **BTech Information Technology**
West Bengal University of Technology
Degree Project | IIT Kharagpur, India
2019

👨‍🏫 TEACHING EXPERIENCE

- ▶ **Teaching assistant | KTH, Sweden**
 - Machine Learning
 - Programming Fundamentals
 - Multivariable Calculus
 - Computer Networking
 - Visualisation
- ▶ **Visiting Lecturer | NSHM Kolkata, India**
 - Interactive Computer Graphics

💻 PERSONAL PROJECT

- ▶ **AI Assistant for Burnout Prevention**
 - Experimenting with LLMs & APIs to build my personal assistant inspired by Ghibli animes

☰ CORE COMPETENCIES

- ▶ **UX Research:** Diary Study, A/B Testing, Soma Design, Survey Contextual Inquiry, Interviewing
- ▶ **Applications:** Miro, Figma, Unity3D
- ▶ **Programming:** Python, C/C++
- ▶ **Libraries & Frameworks:** Jest-Axe, PyTorch, Tensorflow, Pyttsx3, Plotly, Jax, OpenCV, GLSL
- ▶ **Project Management:** Jira, Notion
- ▶ **Tools:** Reality Capture, Claude API, Git, Colab
- ▶ **AI Art:** Midjourney, Stable Diffusion, Kling AI
- ▶ **Devices:** Oculus, HTC HMD-Tracker, P Omni

🗣️ LANGUAGES

- ▶ English **C2**
- ▶ Bengali **C2**
- ▶ French **A2**

🤝 VOLUNTEER EXPERIENCE

- ▶ **EPFL Consulting Society:** Mentored (1sem)
- ▶ **Albaladejo Rugby:** Won match against Geneva
- ▶ **HackZurich:** Liaised participant & companies
- ▶ **KTH AI Society:** Hosted podcasts & hackathons

♥️ ADDITIONAL

- ▶ **Citizenship:** Indian
- ▶ **Interests:** • Anime • Musical Somatic Thinking
- ▶ **Availability:** From December 2026
- ▶ **French Training** A2 – B1 at CAEL Paris
